

MP Gear
marine gear oil

Rock Oil Gear hypoid gear oil is developed from the finest base stocks available combined with state-of-the-art extreme pressure (EP) additives for use in hypoid axles and gear boxes. It is blended to the requirements of the A.P.I. specification GL 5 making it especially suitable for applications where EP oil is recommended, in particular outboard lower units and I/O transmissions.

It contains an advanced additive package which ensures optimum performance and protection under extreme conditions whilst providing maximum thermal stability, anti-corrosion and seal protection qualities.

It meets or exceeds the following specifications:
API GL 5

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

MPH
marine transmission oil

Rock Oil MPH is for use in marine power trim units and hydraulic steering systems. It is highly resistant to wear, oxidation, corrosion and foaming. It is suitable for use in marine equipment wherever an ATF DII fluid is recommended.

It meets or exceed the following specifications:
GM DEXRON II

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

MPG
universal marine grease

Rock Oil MPG is a multi-purpose lithium based grease containing zinc oxide additive to repel moisture making it particularly suitable for use in marine outboard and inboard engines. It's thermally sensitive construction makes it ideal for use in boat trailer hubs and stern tubes.

Available Sizes: 500g.

Super Marine Inhibitor
marine maintenance spray

Rock Oil Super Marine Inhibitor Spray consists of a light mineral oil blended with sophisticated corrosion inhibitors and oxidation stabilisers. In use it produces a soft oily film which coats the unexposed internal surfaces. It is ideal therefore, for applications such as laying up internal combustion engines. It may also be used on external surfaces where it yields a water repellent lubricated surface which also prevents rust formation.

Available Sizes: 400ml Aerosol.

ROCK OIL has vast marine lubricant experience thanks to its 80 years of blending and manufacturing history. With today's modern marine applications, lubricants have to work harder than ever to ensure optimum performance and reliability. To achieve these demanding criteria, Rock Oil has succeeded in developing a sophisticated range of products to cater for every possible need, including, engine oils, gear oils, transmission oils, greases and a whole range of ancillary products. This pursuit of excellence has resulted in the highly prestigious NMMA certification for our cutting edge MP 3 and MP + lubricants.

Using the correct lubricant is essential in ensuring the long term reliability and protection of your engine. Every Rock Oil product is engineered to perform a specific task, assuring you of the highest performance for your own individual requirement.

MP 3 Sport semi synthetic 2 stroke marine outboard

The only test procedure for 2 stroke engines that carries a recognised specification are the NMMA TCW tests. NMMA oils have in the past shown performance deficiencies in high performance "air cooled engines". However, Rock Oil overcame this "air cooled deficiency" and produced MP 3 Sports, a NMMA TC-W3 approved oil, capable of the lean fuel to oil ratios of modern high performance air and liquid cooled two stroke engines. The benefits from MP 3 Sports include an excellent cleanliness of combustion, providing very low rates of emission, and versatility to cope with the wide range of fuels available world wide leaded or unleaded. The result of tests, have shown MP 3 Sports to be particularly excellent in anti-plug fouling capabilities and able to provide superlative anti-wear and anti-scuffing as well as high resistance to piston seizure, ring sticking, port blocking, piston varnish and combustion chamber deposits. To give an indication of the lubrication potential of MP 3 Sports it should be noted that phase 1 of the NMMA tests includes running at a fuel oil mixture of 150:1.

MP 3 Sports can be used in injection or premix systems, when using as a premix it should be used at manufactures' recommended ratios and mixed thoroughly.

It is approved for all 2 stroke outboard motors and meets or exceeds the following specifications:
[NMMA TC-W3](#)

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

MP + Sport semi synthetic 4 stroke marine outboard

Rock Oil MP Plus semi synthetic engine oil is specially designed for use in all modern 4 Stroke outboards. MP + Sport has recently been reformulated and improved and has attained the prestigious NMMA FC-W accreditation. With all new modern 4 stroke outboards requiring this specification, MP + Sport can be used with confidence in all 4 stroke outboard applications where NMMA FC-W is required.

MP plus has been blended from the highest quality base oil with state-of-the-art synthetic additives to withstand the rigours of the marine environment. It provides excellent protection from start-up, even in the lowest temperatures, to the high operating temperatures of high revving 4 stroke outboard engines. The advanced additive technology gives maximum protection whilst reducing deposits and corrosion on all components, ensuring longer engine life and optimum performance in all conditions.

It is suitable for use in both petrol and diesel outboards where a 10w30 or a 10w40 engine oil is recommended.

It is approved to the following specifications:
[API SL NMMA FC-W](#)

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

MP 4 Sport semi synthetic marine inboard

Rock Oil MP4 Sports semi synthetic engine oil is a premium grade 4 stroke engine oil designed for the latest new generation high performance engines. The advanced additive, high detergent formulation ensures maximum engine component protection and superior resistance to deposits and corrosion, resulting in extended engine life and optimum performance under all conditions. It is especially suitable for the latest inboard high output marine applications.

It meets or exceeds the following specifications:
[API SL/CI-4 ACEA A3/B4 E5/E7](#)

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

Bio Marine 3 bio-degradable synthetic 2 stroke outboard

Rock Oil has developed a bio-degradable ester based fluid Bio Marine 3, which offers outstanding engine performance.

Bio 3 combines this technology with the most advanced ashless additives available to ensure that users of high performance 2-stroke outboard engines achieve the maximum possible engine life whilst maintaining maximum power. It has also passed The strongest chainsaw lubrication tests and can successfully be used in a wide range of engines from small single cylinder units up to high output multi cylinder versions.

Bio 3 is suitable for use in oil injection systems or as a pre-mix and has excellent lubricating and wear prevention capabilities, ensuring extended engine life. The sophisticated additive system coupled with the advanced synthetic base stocks ensure outstanding engine cleanliness, reduced visible emissions and an unrivalled prevention of plug fouling, ring sticking and port blocking. This maximises engine performance over the service intervals. Bio 3 offers an ecologically friendly high performance "clean" engine oil, extended engine life and reduced maintenance costs.

It is approved for all 2 stroke outboard motors and meets TCW-3.

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.

Non TC-W3 2 Stroke engine oil

Rock Oil offer two high specification 2 stroke lubricants for use when a non TC-W3 two stroke oil is recommended.

Both PP2 (semi synthetic) and Synthesis 2 Injector (fully synthetic) meet the very latest international 2 stroke specifications. They are both ashless clean burning lubricants ideal for use in high powered 2 stroke applications.

They meet or exceed the following specifications:
[JASO FC ISO-L-EGD API TC](#)

MP Lite D multigrade diesel engine oil

Rock Oil MP Lite-D is a high quality multigrade oil suitable for use in small capacity non-turbo diesel engines.

MP Lite-D multigrade diesel engine oil is equally applicable to engines where the manufacturer recommends a 10w30, 10w40 or a 15w40 API CC engine oil.

It meets or exceeds the following specifications:
[API CC](#)

Available Sizes: 210L Barrel/25L Drum/5L Poly/1L Bottle.
